REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art does not provide for, nor suggests providing for a method of identifying optimal allocations of computing resources which the optimized mapping of service nodes including requirements of a number of tasks per unit time and capacity of the number of tasks per unit time. The layers are mapped based on the demand and capacity attributes from one layer to another, thereby ensuring that enough capacity resources are provided for the demand resources of the other layer. The demand attributes correspond to the quantity of a computing resource required by the component for performing the associated function. The capacity attributes correspond to the quantity of computing resource that are available to assign to the components of adjacent layers. Each layer has both an associated demand attribute and capacity attribute, which can be used to associate multiple layers together and then determine the optimized mapping of one layer to another. The closest prior art of record, Pace-Hauser combination, does not suggest models in multiple domains (i.e. hardware and software), merely only hardware. There are no multiple layers in each domain (i.e. multiple software layers or multiple hardware layers).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
